

A platform for sustainable freight in India

Authors: Sudhir Gota, Parthaa Bosu, Lavanya Padhi and Kaushik Hazarika

Indian Freight sector – Status & Challenges

- Freight via road is **>70%**
- High logistics cost **13-14%** of GDP
- Livelihood **>20 M**
- Indian HDV greater than 12 tons represent about **60%** of total fuel use
- **High emissions.**
In cities (Delhi) – 67% of total PM2.5; 61% SO₂ and 62% NO_x
- Freight sector is highly **fragmented**
- Needs mechanism of **stakeholder consultations** for policy design
- Lack of **capacity** – improve fuel efficiency, monitoring fuel use

INDIAN FREIGHT Multiplicity of Players

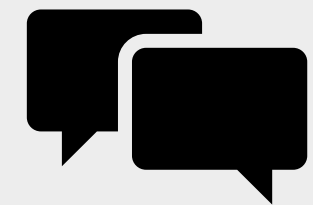

Sustainable GF Coalition

Knowledge repository & Strategic research

Launch 1st National level Freight platform

Pilot – 1. Technology 2. Innovative policy design

Submitted to
7th International Workshop on Sustainable Road Freight
